

TST PPE for handheld waterjetting plus robotic and automatic
Single 1000 BAR / 15 000 PSI Rotor 2800 BAR / 40 000 PSI

AREAS WITH PROTECTION

It is essential that the operator knows where and for what the clothes protect. Striped fabric clearly identifies protective areas, and the label tells the level of protection. Yellow label indicates protection for 1 000 bar/15 000 psi single jet and 2 800 bar/40 000 psi rotor jet.

PROTECTION LEVEL 10/28

-  SINGLE 1000 bar/15000 psi
-  ROTOR 2800 bar/40000 psi

CE Regulation (EU) 2016/425

KEEP DRY AND LIGHT

The outer fabric in Techsteel™ is both dirt and water repellent, which keeps the operator dry and light all day long. Techsteel™ has a very high resistancy against abrasion and tearing, over 500 000 Martinda-le. The outer material is furthermore reinforced with Vectran® (LCP) for maximum strength and durability. The request for these qualities comes originally from the industry of concrete removal and demolition.

TST protective clothing for waterjetting has highest mobility and compliance in the industry

THE WORLD'S STRONGEST FIBER HAS GOT YOU COVERED

In protective areas of the clothing, TST use an ultra strong and ultra light fiber – Dyneema®. The fiber is 15 times stronger than steel and up to 40 % stronger than aramids. This enables TST to develop protective clothing which are lighter and more comfortable, without compromising safety and durability.
